

Data in Everyday Life

Here are a few common examples of how data helps in our daily decisions:

Situation	Type of Data Used	Decision Made
Checking the weather forecast	Temperature, rainfall chance	Decide whether to carry an umbrella
Online shopping	Product ratings, prices, reviews	Choose the best and most affordable product
Health tracking	Steps walked, calories burned, heart rate	Plan diet or exercise routine
Budgeting	Monthly income and expenses	Plan savings and spending
Education	Test marks, attendance, study hours	Improve performance and time management
